

DVR-4000

Standalone or PC-Connect DVD-R Duplicator

The DVR-4000 is a high-performance, multi-drive DVD Recordable duplication system from MicroBoards Technology, LLC, featuring technology from Hiei Sangyo. The DVR-4000 works in standalone mode as a multi-drive DVD-R duplicator or in Direct SCSI™ mode as a multiple master writer from a computer host. As production requirements increase, the optional VMI card technology allows for system expandability. The system also provides verification of data via the master DVD disc, and supports DVD-ROM, DVD-R, and DVD-VIDEO formats. One button operation on the intuitive user interface results in ease of use for any novice DVD user.

The DVR 4000 is the World's First Standalone DVD-R multi-drive duplication system, from MicroBoards, the Leader in CD / DVD Recordable Technology.

Features:

- Standalone DVD-R multi drive duplication, no PC required
- Extensive system cooling for dissipation of heat generated by continuous operation
- Easy one button operation for user friendly application
- Direct SCSI feature for creation of master DVD-R discs in the target DVD-R recorder
- Original VMI card interface for expansion to up to (3) slave units per master system
- Automatic DVD format detection
- LCD Display
- LED Error Indication
- Automatic format Detection
- Heat-dissipation air slot design
- 2.5-6X Read Speed
- Built in Large-Capacity SCSI HDD
- CD-ROM Firmware Upgrades

Specifications:

- Number of DVD-R recorders: 4
- Number of DVD Rom readers: 1
- Power Requirements: AC 115/230 V switchable
- Dimensions: 200 (W) X 345 (H) X 465 (D) mm
- Weight: 20 kg
- VMI slots: 3
- Disc capacity: 4.7 GB
- Write time: Approx 50 minutes/disc
