

PlayWrite MP3, from MicroBoards Technology, Inc., is the first CD Recordable system that gives PC users the ability to create customized audio CD's from the internet. By using new revolutionary MP3 technology, internet users can download a variety of audio tracks from a multitude of MP3 websites, and use the PlayWrite MP3 system to burn an audio CD that is playable in virtually any standard CD player or reader. PlayWrite MP3 allows the user to create a customized audio tracklist on the system hard disk, and **burn up to 74 minutes of audio tracks to a CD in less than 15 minutes!** PlayWrite MP3 also comes with PlayWrite BackUp software, a new solution used to backup any system hard drive with the click of one button. PlayWrite MP3 is the complete internet audio and data backup solution for CD Recordable technology on the PC.

### PlayWrite MP3 Features:

- Create customized audio CD's from MP3 files downloaded from the internet. Use the PlayWrite MP3 software to create a tracklist, convert to Red Book audio format on the fly, and burn the audio CD. Play the MP3 files back on the PC, prior to burning the disc. The PlayWrite MP3 software automatically deletes the temporary Red Book image file after recording, **therefore large amounts of free hard drive space is not required.**
- Use the "DeClick and DeHiss" function of the PlayWrite MP3 software to clean up downloaded MP3 (and .WAV) files.
- Utilize the timer function of the PlayWrite MP3 software to set the system to record audio files from any analog audio device during off hours, including radio and television.
- Archive critical system data to CD R with the PlayWrite BackUp software in one easy step. Span multiple CD R discs and backup an entire hard drive image regardless of capacity. Reload system data to the hard drive by simply installing the backup CD in the system reader, and clicking "Restore."
- Simply install the PlayWrite 4420 into any open 5<sup>1</sup>/<sub>4</sub>" peripheral bay, and connect to any open ATAPI interface on the motherboard.

### The PlayWrite MP3 System Includes:

- PlayWrite 4420 CD ReWritable Drive (Internal 4 X 4 X 20)
- PlayWrite MP3 audio software for the internet
- PlayWrite BackUp software
- (2) pieces of PrintWrite CD R media
- Internal ATAPI ribbon cable
- Complete user manuals and documentation

### Minimum System Requirements:

- Windows 95 or higher
- Pentium 166 Mhz or higher PC
- 32 MB RAM
- 2.2 GB Hard Drive
- Sound Card (Sound Blaster compatible)
- Free half height drive slot
- Open IDE connection on motherboard
